Daftra

Tailored solutions for all business types and sectors

Adaptable solutions to meet each industry's unique needs with a variety of features and customization tools, our platform helps businesses in different sectors manage their operations and grow to their full potential.

RETAIL MANAGEMENT

Manage Retail Stores from invoicing, sales, inventory and purchases to suppliers and employees. Issue sales invoices and follow up on sales through Daftra POS application that supports barcode devices. With Daftra Inventory, track stock movements and display periodic profitability reports.

Manage your entire retail finances and Accounting

Daftra Accounting helps you automate your finances, from issuing invoices, following up on product sales, moment by moment, to managing expenses and revenues. Display financial reports, calculate net income for different periods of time and easily track your profits.

Sell more with Barcode integrated invoicing

Create barcodes for your products to label them for efficient inventory management. By utilizing barcodes, you can improve the accuracy and efficiency of your inventory management system, making it easier to track your products and devices and ensure that your business runs smoothly.

Track your inventory, warehouse movements and stock of products

Keep track of your sales of products and their movement and get alerted before a product is about to run out, issue a purchase order from your suppliers and refill your stock. Track and filter products by their serial number, lot number and expiry date. Easily perform stocktaking, monitor your quantities and track overages or shortages.

Issue sales invoices to customers and instantly print them

Start issuing sales invoices to shoppers with Daftra Sales and Invoicing software. Adjust invoice data and apply tax and discount rates on products and services. Activate exclusive seasonal offers on products and apply duration-based discount rules on different items within the invoices.

Use Daftra POS and manage sessions and employees' shifts

Open sessions for you or your salespeople, and find a dedicated sales screen designed to provide a clear and seamless display showing product lists with names and images divided by their categories and fully integrated with barcode devices.

Engage with your store staff all the time

Add staff members and track the sales and activity of each one separately. Set commission-based sales targets and follow up on your team's achievements. Stay informed of your employees' performance through advanced reporting.

LEARNING & TRAINING

Manage your educational and training center with Daftra business management software. Create invoices for training and education programs, teaching tools, and study materials. Follow up on students and trainees, organize classes and training sessions between students and teachers, and send alerts to trainees to inform them of your latest courses, dates and offers.

Manage your Entire Educational Center Finances

Streamline the accounting and bookkeeping of your educational center. Invoice trainees for courses and educational materials while monitoring student enrollment. Keep an eye on your center's income and expenses and generate reports with the net profit.

Keep track of your stock of educational material

Get alerted if one of your items is running low, place a purchase order from your suppliers, refill and never run out of stock. Display your material and books' buy and sell rates and determine your expected profits from each sale.

Maintain complete trainees' records

Record client information and payment history, and attach notes, photos, and certificates to their profiles. Follow up with clients periodically by phone or email to update them on their progress and inform them of future courses. Manage scheduling between students and trainers, assign specific trainers to students, and track their performance.

Assign tasks to trainers and track their performance

Add staff members and assign them different authorizations according to their job roles. Assign students to trainers and specify their tasks. Filter reports by employee and track each employee's performance.

Offer students course payment installments

Facilitate course payments for clients and students by enabling payment installments. Choose the number and duration of the installments and track their payment status. Record payments and receive notifications for due and overdue installments.

Create training courses' work order files

Create new work orders for premium courses and assign trainees to manage them. Record income and expenses and schedule session dates. Monitor the net profit of each course.

MEDICAL & HEALTHCARE

Manage your medical clinic with Daftra business management Software. Issue invoices for health care services, check-ups or medical supplies. Follow up on patients and their health developments, organize medical check-ups and operations with doctors and send notes, results or updates electronically via email.

Automate your Clinic's Finances and Accounting

Manage all your clinic or medical center finances. Issue check-up invoices and inform patients of them. Track your sales from medicines, medical supplies, x-rays, and analyses. Follow-up on your clinic's income and expenses and get reports of your profits.

Monitor your stock of medical equipment and medication

Monitor stock movements from outbounds and inbounds. Receive alerts of nearly out-of-stock items, refill and never run out of stock. Perform stocktaking, track medicinal products by their expiry date and stock quantities and issue inventory reports.

Add patient reception orders and manage cases and operations

Create files for each patient reception order, specify appointment details and check-up status. List invoices and payments along with treatment expenses and specify the total amounts owed by patients. Review all patients' operations and procedures logs.

Manage your staff of healthcare specialists

Add your staff of doctors, nurses, and receptionists and keep track of their activity logs. Assign check-ups, medical revisions to specific doctors and follow up on actions taken. Stay updated on the performance of your staff with advanced reporting.

## Provide professional Patient Experience

Keep records of patients with their information and history of check-ups, prescriptions or operations. Add notes, patients' documents, x-rays and analyses. Conduct post-care follow-ups and manage appointment bookings and organize check-up schedules.

Activate medical insurance benefits and elevate patients

Identify insurance companies and determine the insurance co-payment rates that the patient benefits from on the medical products and services provided. Apply insurance rules and rates automatically to invoices for patients with insurance.

GYM & FITNESS

Manage your gym, fitness and health club and offer gym memberships and subscriptions, issue recurring invoices for your monthly gym members. Follow up on the overall sales of nutritional supplements and gym services. Monitor clients' subscriptions, and training programs and follow up on your gym staff and trainers.

Manage your gym's finances and client subscriptions

Issue invoices for subscriptions, products and nutritional supplements sold and training programs. Keep track of product sales, subscriptions, register income and business expenses, and track your periodic net profit.

Create customized subscriptions and membership plans

Manage memberships of your gym and specify the benefits of each membership including the number of training sessions and customizable services per client. Track your clients' package and plan consumption, the status of their available balances and quotas.

Keep track of your inventory of machines & supplements

Monitor the movement of your products and get alerted if one of your items is running low, place a purchase order from your suppliers. Automate stocktaking, track items' availability and expiry date.

Track your gym clients' interactions and engagements

Keep track of your clients' subscriptions, payments, purchases of products and training programs. Assign each client a personal trainer and add notes to each client and attach files.

Manage your team of trainers and track staff performance

Add a database of trainers and coaches and keep track of their activity logs. Stay informed of your staff performance through advanced reporting. Find out the number of membership sales achieved by your team.

Register club fees and trainers' wages

Add all club expenses from rent, salaries, machines and training equipment expenses to be tracked and calculate the net income through profit and loss reports.

AUTO MAINTENANCE

Manage your Auto Maintenance centers, Invoice your clients for maintenance services, manage your inventory of products from oil, tires, spare parts and maintenance equipment, follow up on customers after auto services and organize maintenance appointments with workers and car owners. Notify your customers of their repair work status.

Unit Price: 500 USD

Manage your auto maintenance services' finances

Manage all your center's accounting and bookkeeping. Issue maintenance services and spare parts invoices and collect payments online. Track your total income and expenses and generate reports with your net profit.

Sell more with Barcode integrated invoicing

Create a barcode for your spare parts and maintenance products and equipment and label them. Call items in invoices through dedicated barcode devices.

Manage a database of clients and their maintenance history

Maintain a list of all vehicle owners, their details, contact information and maintenance and repairs history. Set appointments by date and time and notify clients of them. Add notes and attach expense receipts in each client's file and give them access to download them.

Assign tasks to your staff and keep track of their performance

Add your staff members of auto technicians and assign them different authorizations according to their job roles. Assign technicians and specialists to specific clients and specify their tasks..

Keep track of your stock of products and auto spare parts

Generate advanced inventory reports including stocktaking and requisitions. Receive alerts with nearly out-of-stock products and place a purchase order to refill your stock.

Create maintenance work order files and customize their stages

Create a file for each maintenance order with all its actions and details. Add revenue and shipping expenses and define procedures and vehicle status according to each project stage. Determine maintenance costs and service fees and know your net profit.

REAL ESTATE

Manage your entire Real Estate and Construction Agency with Daftra. From Sales and managing realtors to Brokerage and Property Management. Manage projects, create invoices and receive clients' installments and rent payments, record company expenses, manage a commission-based team of sales agents and realtors.

Manage your agency's finances, rental invoices and installments

Register real estate construction expenses under predefined categories and upload photos of their receipts. Create Sales invoices, recurring installments, and rental invoices. Follow up on all the operations through the activity log of each project.

Create and maintain complete buyers' records

Record each client's information, history of purchases, projects and payments. Conduct periodic follow-ups with clients to market your services and real estate. Set appointments and inspections and property delivery dates and time with clients.

Assign tasks to realtors and keep track of their performance

Add staff members and assign them different authorizations according to their job roles. Assign clients to realtors and specify their tasks. Display each staff separate record with all their processes, activities' statuses and filter reports by employee and track each employee's performance.

Create project files and track finances and procedures

Create a file for each new project, specify a budget and add it to your expenses. Add your revenues, expenses, and all your clients' invoices. Follow up on all the operations through the activity log for each project and determine each project's profitability upon completion.

Manage your assets and adjust depreciation settings

Add your facility assets, equipment and constructing machines. Calculate depreciation of fixed and variable assets annually. Re-evaluate or sell the asset at the end of the operating period.

Appoint your team of consultants and advisors to clients

Add staff members and assign them different authorizations according to their job roles. Assign consultants to specific projects, specify their tasks and track their progress with activity logs. Track each employee's performance with advanced reporting.

TRAVEL & TOURISM

Manage travel and tourism companies with Daftra business management software. Create invoices for tourism programs, domestic and international trips, travel and tourism services, follow up on travelers, organize client appointments with travel agents and send alerts to customers to inform them of your latest developments or to market for one of your services or new offers.

Invoice your customers for travel services and offer online payments

Issue invoices to your customers and email them as PDF or print them. Receive payments online by credit card, PayPal or manually (cash or bank transfer). Customize your invoices, put your company logo and other details to look professional.

Manage your travel and tourism agency's finances

Automate your agency's accounting and bookkeeping. Monitor the number of your customers benefiting from your services and their invoices and payments. Keep track of income and expenses and calculate the net income for each period through profit and loss reports.

Invoice customers for trip bookings and offer online payment options

Create invoices for ticket bookings and send them to your customers by e-mail. Offer various payment options including online payments. Receive payments via credit card, online via PayPal or other online payment gateways or in cash. Customize your invoices, put your company logo and other details to look professional.

Maintain complete customer records and manage appointments

Upload each customer's files, documents and notes in their personal file, with logs of previous travel services and payment history. Schedule appointments between customers and travel agents and follow up on actions taken. Inform travel customers of updates or new offers.

Assign tasks to your agents and track their performance

Add staff and give them authorizations according to their roles. Assign your staff to specific customers and track their performance. Stay updated on the performance of each employee with advanced reporting.

Manage your transportation company's finances

Automate your company's accounting and bookkeeping. Monitor the number of your customers benefiting from your services and their invoices and payments. Keep track of income and expenses and calculate the net income for each period through profit and loss reports.

FACILITY MAINTENANCE

Manage facility maintenance and technical support centers with Daftra. Create invoices for facilities' maintenance operations, manage your inventory of products and spare parts, follow up on your customers after maintenance and organize maintenance appointments with technicians and customers.

Manage your center's finances, issue invoices and track profits

Manage all your maintenance center finances and issue maintenance and spare parts invoices. Calculate your center's income and expenses and know the net profits for each specific time period through profit and loss reports.

Maintain customers' maintenance history and payments

Keep record of each customer's information, their facility and history of maintenance operations. Determine the maintenance dates, receipt and delivery by date and hour. Inform customers of any maintenance center updates with auto-alerts.

Assign tasks to your staff and track their performance

Add technicians and personnel and assign them different authorizations according to their job role in the maintenance center. Assign clients to certain staff members and monitor their performance in maintenance operations.

Keep track of your stock of products and spare parts

Track your stock of products and spare parts with Daftra Inventory management. Receive alerts when a product is about to run out to issue a purchase order. Easily track products with their unique serial numbers and perform stocktaking

Add maintenance orders and track their processes and expenses

Create a file for the customer's maintenance order and specify the dates and actions to be taken each time. From bills and payments to maintenance operating expenses, determine the total amounts due to the customer.

Manage assets and adjust depreciation settings

Add the assets of your center from equipment and operating machines. Calculate depreciation of fixed and variable assets annually. Re-evaluate or sell the asset at the end of the operating period.
